

Parallel Architectures and Systems

Term Project Information

Dr. Edwin Sha

Due Date: **1pm, April 8, 2010**

(10 points) Term project is a very important part of the course. The term project can be ANYTHING related to “parallel” stuffs. Write a short description in a page to describe the idea of your term project and what you plan to do. The term project can be done by 3, 4 or 5 students. **Each group just give me one report.** You should not work alone. Check the course web page to see the requirement and some suggested ideas. Then do the literature search and web search for more information.

Each team will give a presentation in class. So I need to schedule your presentations. Answer the following questions.

1. List of team members: (First-name Last-name)

2. Title:

3. Abstract:
