

IntelliChoice, Inc.

IntelliChoice is a non-profit organization under the IRS 501(c)3. We are working on a math tutoring program for the underprivileged children who lack educational opportunities and resources. We believe that mathematics is one of the most important academic subjects for a young student and can best be developed at an early age. Proficiency in mathematics will also lead to a greater interest in other subjects.

Currently, we are serving 50 students from K to 12 in low income neighborhoods in south Dallas. Opening hours is from 10:00 am to noon on Saturdays. The starting date for this coming academic year is August 26, 2006, Saturday. The tutoring sessions will be held at the Martin Luther King, Jr. Center Library at 2922 Martin Luther King Blvd, Dallas, TX 75215. The material used in the program is Kumon Math which is a popular supplemental material for after school program.

I am teaching electrical engineering at the University of Texas at Dallas and my wife, Jung, is teaching mathematics at Southern University. We initiated a similar tutoring program in Baton Rouge, Louisiana, from 1993 to 2001 under the name of Math School of Baton Rouge. During the first three years, we taught at an elementary school with students from 2nd to 5th grade three times a week. There were four classes with a total of about 50 students. From 1996 to 2001, we taught math and science at a high school. Attached is an article about the program covered by Louisiana State University's newspaper. Deon Knox who was interviewed in the newspaper had a D in his algebra grade in the fall semester, and then it was improved to an A in the spring semester progress report. We would like to see similar successes from all students we help.

Gil Lee, Ph.D.
