Course Syllabus

CS 6301.002 Implementation of advanced data structures & algorithms; Spring 2016; TR 1:00-2:15; ECSS 2.410
URL: http://www.utdallas.edu/~rbk/teach/2016s/iadsa.html

Professor Contact Information
Balaji Raghavachari; (972) 883-2136; rbk@utdallas.edu; ECSS 4.225;
Office hours: Mon/Wed 2:00-2:30 PM; Tue/Thu 2:15-3:00 PM.

Course Pre-requisites, Co-requisites, and/or Other Restrictions
CS 5343 or equivalent (Data structures and algorithms): Analysis of algorithms. Stacks, queues, and trees. Heaps, hashing, and advanced sorting techniques. Disjoint sets and graphs.

Course Description
Topics: Implementation of data structures, such as Lists, Trees, B-trees, Splay trees, Skip Lists, Graphs; Algorithm design: Recursion, Divide-and-conquer, Dynamic Programming; Implementation of algorithms.
Projects: Course emphasizes a practical approach to algorithms with many programming projects:
- Type 1: Implementation of data structures and algorithms
- Type 2: Empirical study comparing performance of algorithms
Projects can be done in groups of 1-3 students. Each project has 2 deadlines. Only projects submitted by the 1st deadline are eligible for excellence credits. If a team with x members submits a project that receives excellence credits, then each team member will receive f(x) fraction of the credits (f(1) = 1; f(2) = 0.8; f(3) = 0.67).

Student Learning Objectives/Outcomes
Design data structures for given situations, study efficient algorithms for a number of practical problems, learn techniques for designing algorithms, and efficient implementation of data structures. At the end of the course, students are expected to have the following abilities: (1) Use/implement advanced data structures, (2) Use/implement algorithms, (3) Evaluate performance of data structures implementations.

Required Textbooks and Materials
No text book is required. Reference: Any book on DS&A such as Cormen et al's “Introduction to Algorithms.”

Assignments & Academic Calendar
Exams: TBD.

Grading Policy:
A grade: 90% in projects, 85% in exams, 5 participation credits, and 2 excellence credits
B grade: 80% in projects, 70% in exams, and 3 participation credits
C grade: 65% in projects and 55% in exams

Course & Instructor Policies
- Projects must be submitted online by their deadlines. No submissions will be accepted after the 2nd deadline for any project. All submissions must be your own work. Do not seek outside help in implementing projects.
- Students are expected to participate in discussions (in class and on elearning). Participation credits can be earned by contributing to discussions on elearning forums.
- Regular class attendance and participation is expected and is the responsibility of each individual. There is a strong correlation between regular class attendance and good performance. If a student should elect not to attend a class, (s)he is responsible for any handouts, announcements, reading material and contents of missed lectures.
