Curriculum
Students in the PhD in Mechanical Engineering program will be instructed in advanced core principles and have the opportunity to conduct research that will ultimately help solve problems in energy, healthcare, security and transportation.

Career Options
Graduates of the program seek positions such as: Professor, Research Scientists at corporate or national laboratories, Research and Development Engineer for the design, manufacturing, control, and operation of components and systems in energy, health care, security and transportation and Consulting Engineer in the public and private sectors.

Degree Program
The PhD in Mechanical Engineering requires 75 semester credit hours minimum beyond the baccalaureate degree.

For complete admission and degree requirements, view the Graduate Catalog at catalog.utdallas.edu.
